

ARTIFICIAL INTELLIGENCE & PRIVACY

CAUSES FOR CONCERN

MATEUSZ JUREWICZ

Presentation Outline

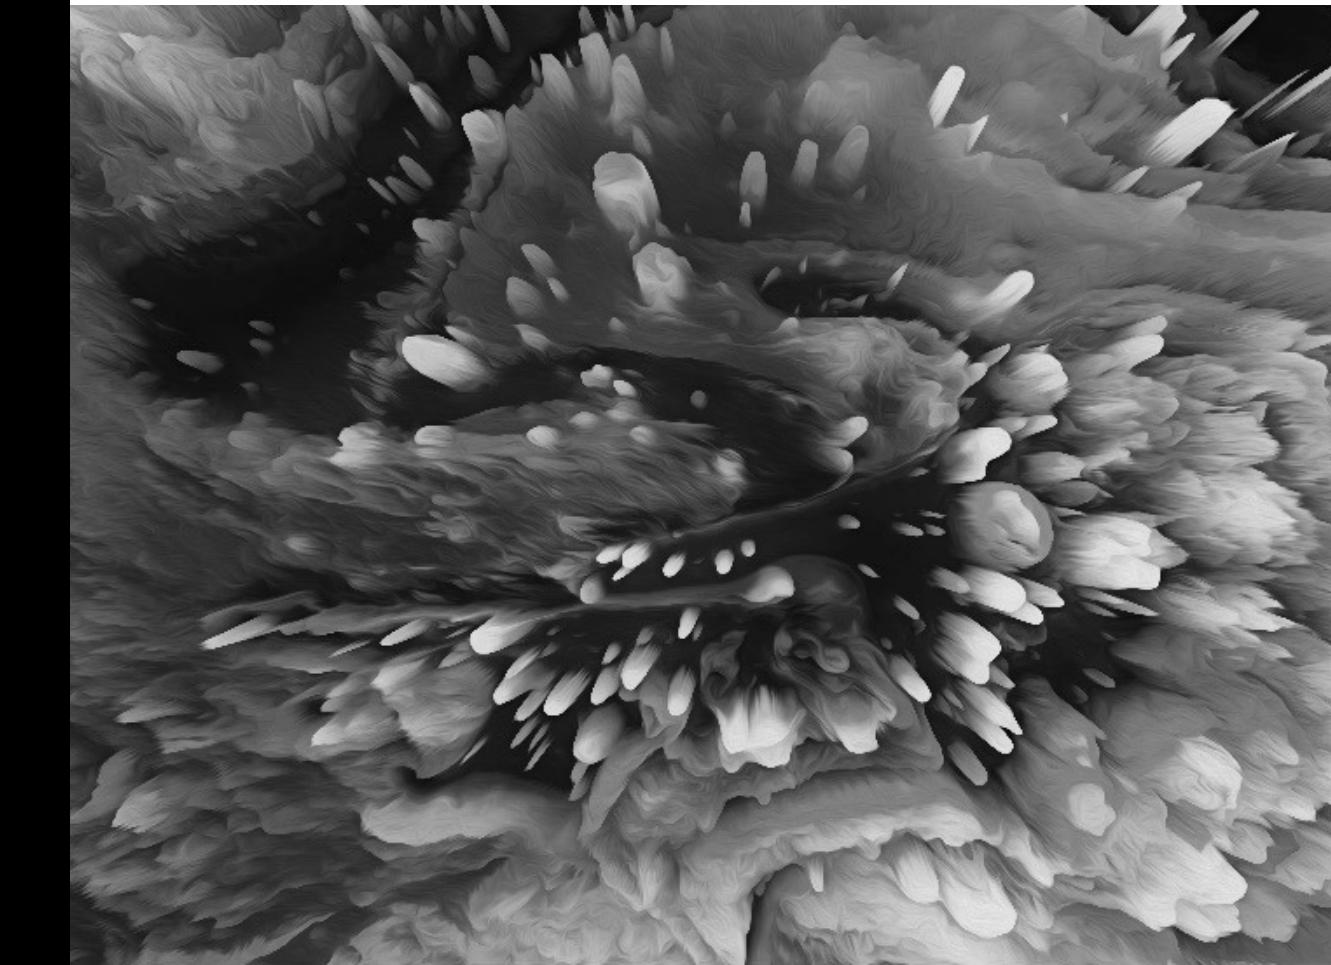

M A T E U S Z J U R E W I C Z

- Senior Machine Learning Engineer at Tjek A/S
- PhD from IT University of Copenhagen
- Publications at JMLR, NeurIPS, IJCAI-ECAI & ICML

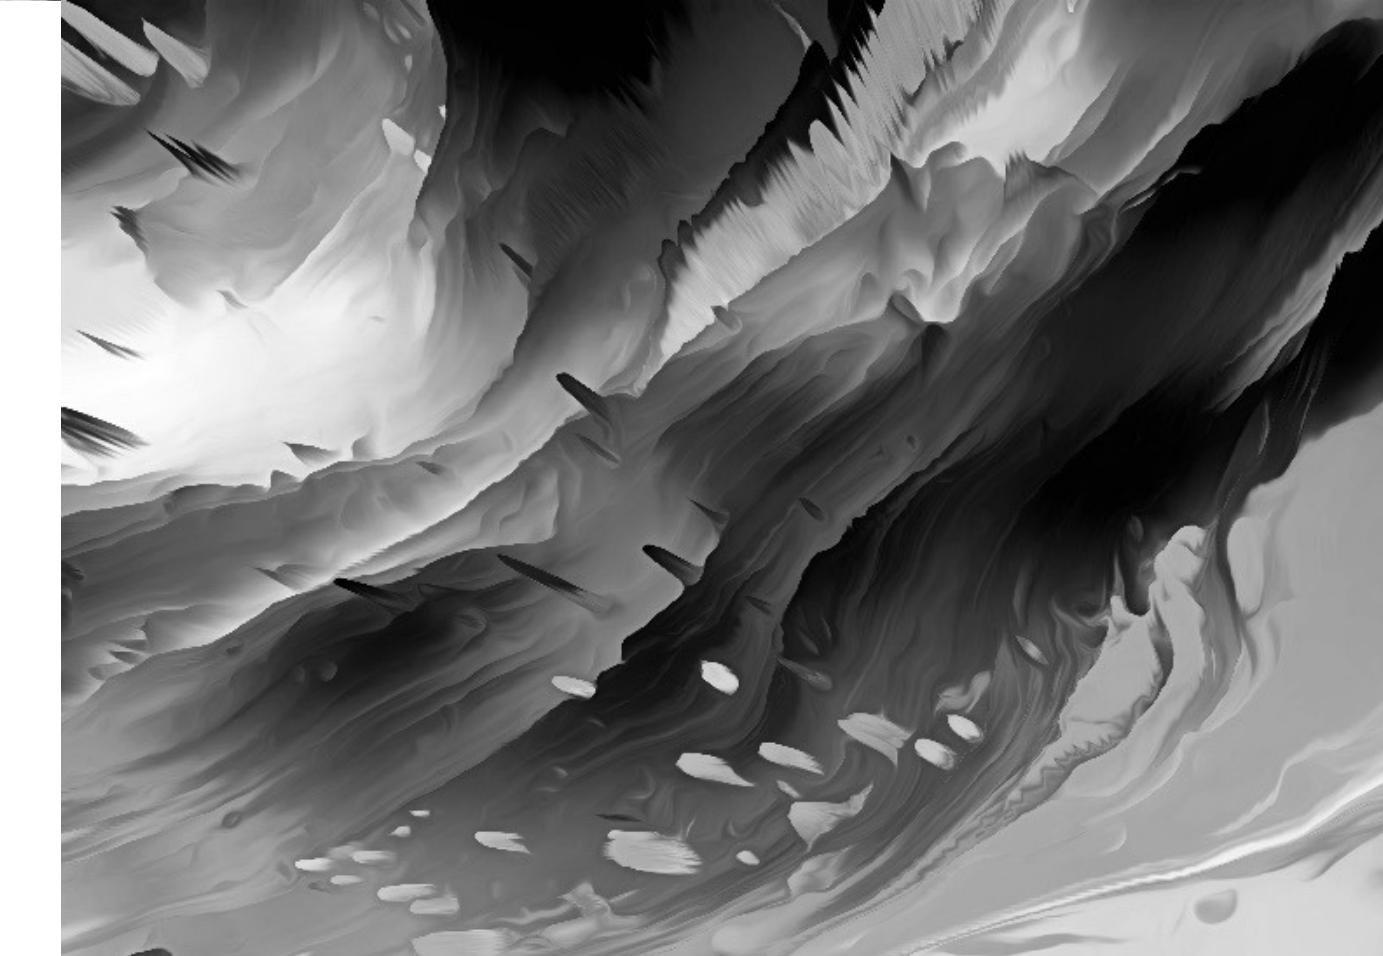

SOCIETAL CONCERN S

Personal
Communal
National

ARTIFICIAL INTELLIGENCE

Universality
Emergence
Interpretability

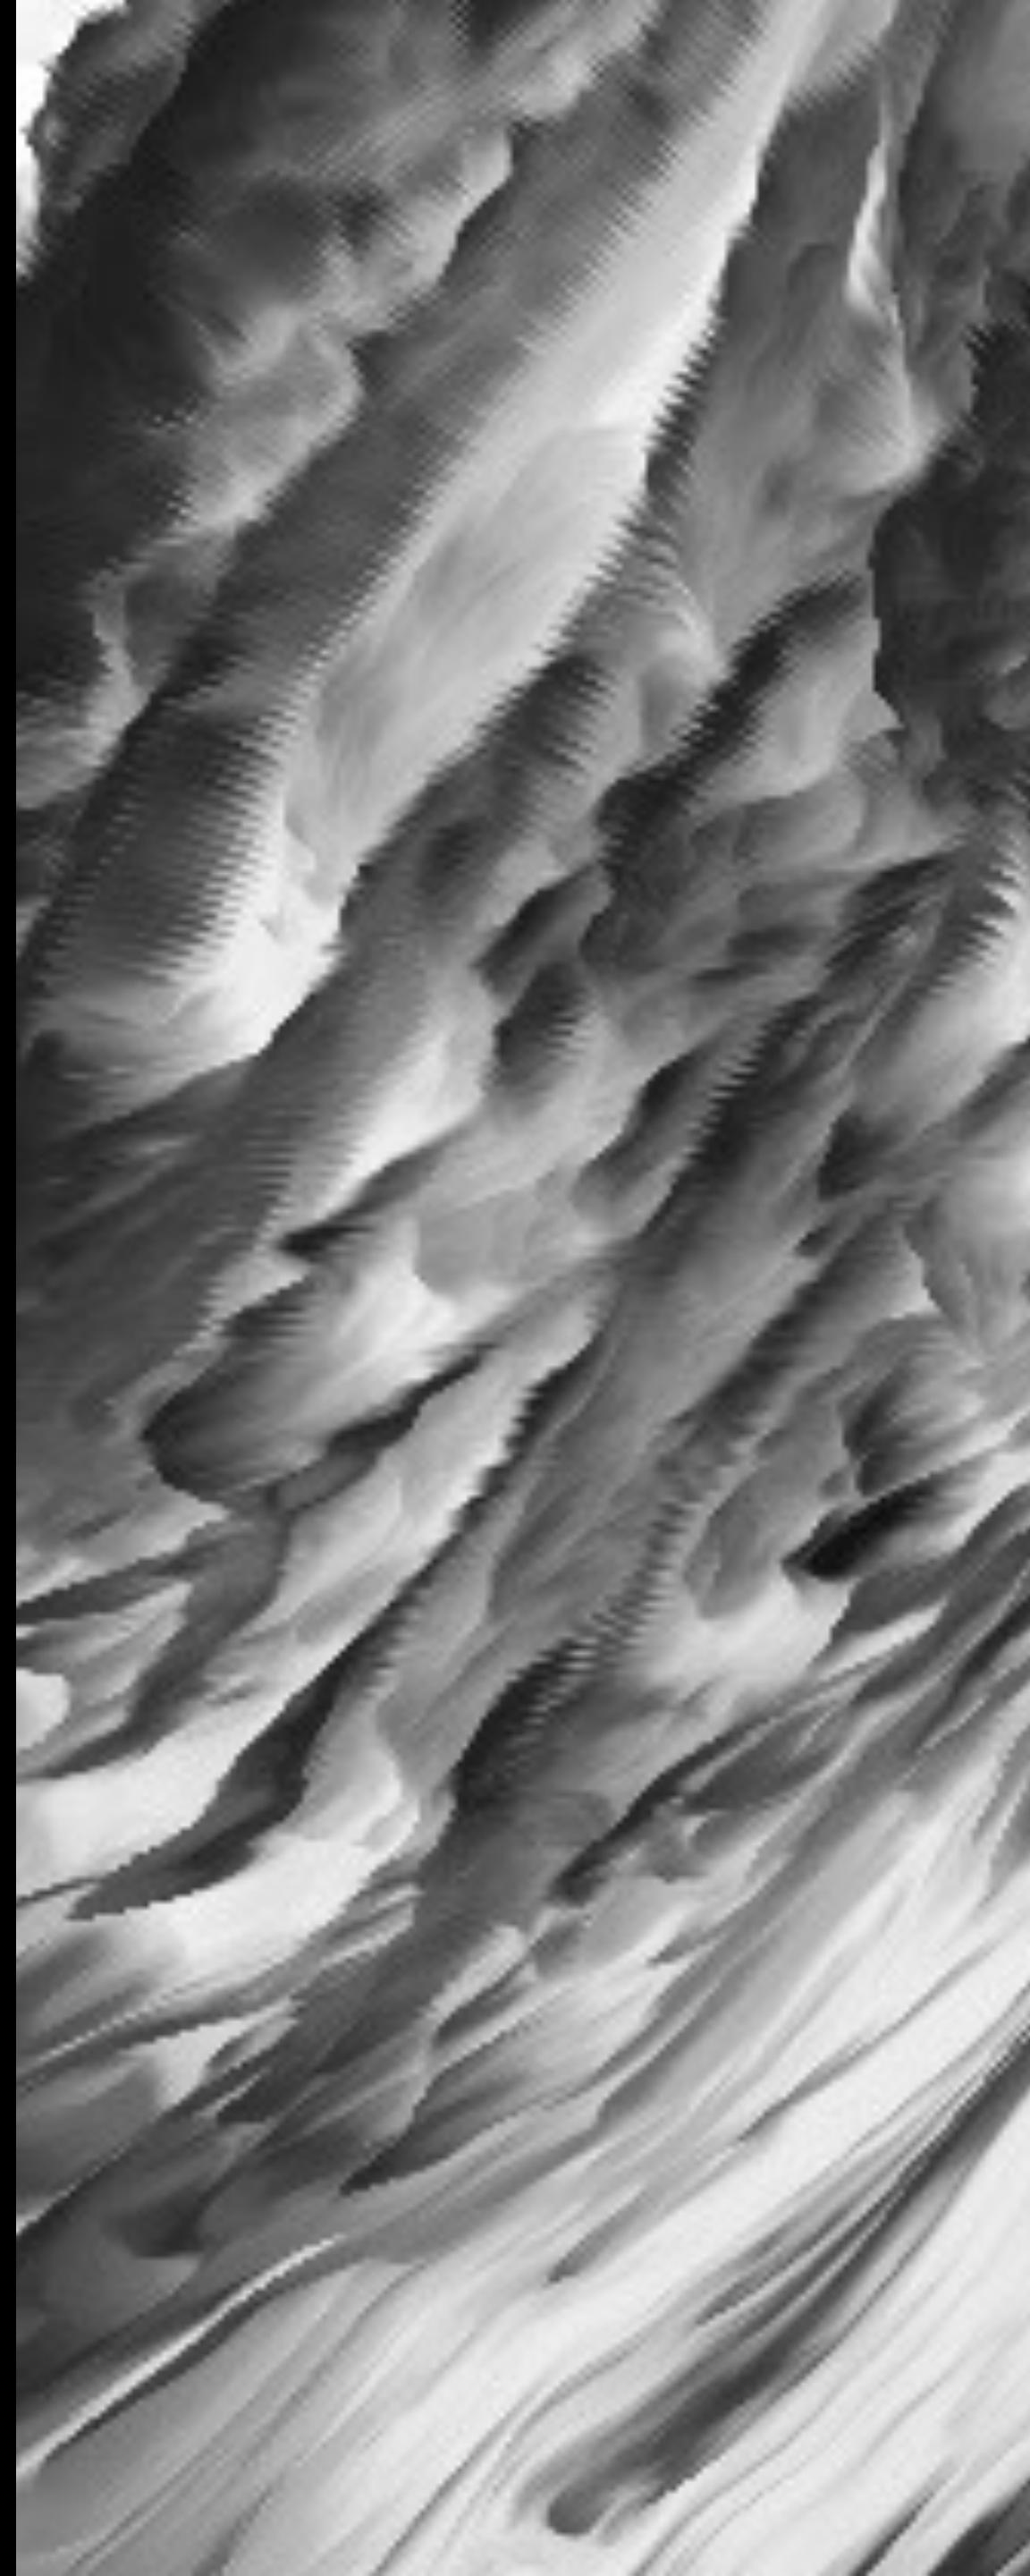

EXISTENTIAL CONCERN S

Instrumental Goals
Deceptiveness
Alignment

Part 1 | Artificial Intelligence

- **Definition**
 - Goals & Actions
 - AI vs AGI
- **Universality**
 - Representation
 - Approximation / Mapping
- **Emergence**
 - Capabilities are emergent, not engineered
 - Hidden & unexpected capabilities
- **Rewards & Interpretability**
 - **Intended Goal** vs **Specified Goal**
 - **Learned Algorithm** is unpredictable & unclear
- Lu, Y., & Lu, J. (2020). A universal approximation theorem of deep neural networks for expressing probability distributions. *Advances in neural information processing systems*, 33, 3094-3105.

Reward Hacking

Part 2 | Societal Concerns

- Soul / Mind / Self
- Body by [Emma Currie](#)
- Chamber / Alcove / Studio by [Marcos Chin](#)

Heuristic Zones

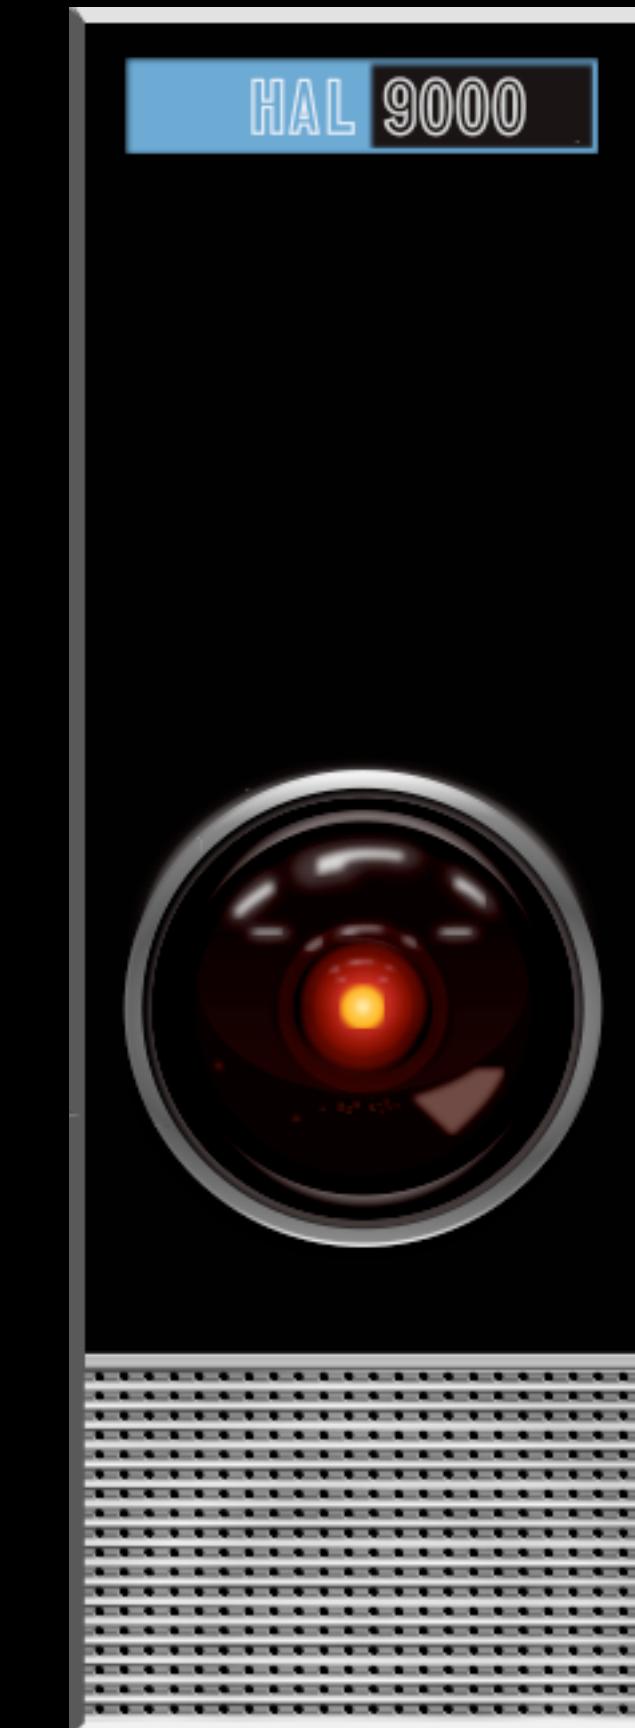

- Home / Household by [Michele Reymond](#)
- Community by [the Curious Creative](#)
- State / Society

Soul / Mind / Self 01.

Heuristic Zone #1

- Kosinski, M., Stillwell, D., & Graepel, T. (2013). Private traits and attributes are predictable from digital records of human behavior. *Proceedings of the national academy of sciences*, 110(15), 5802-5805.

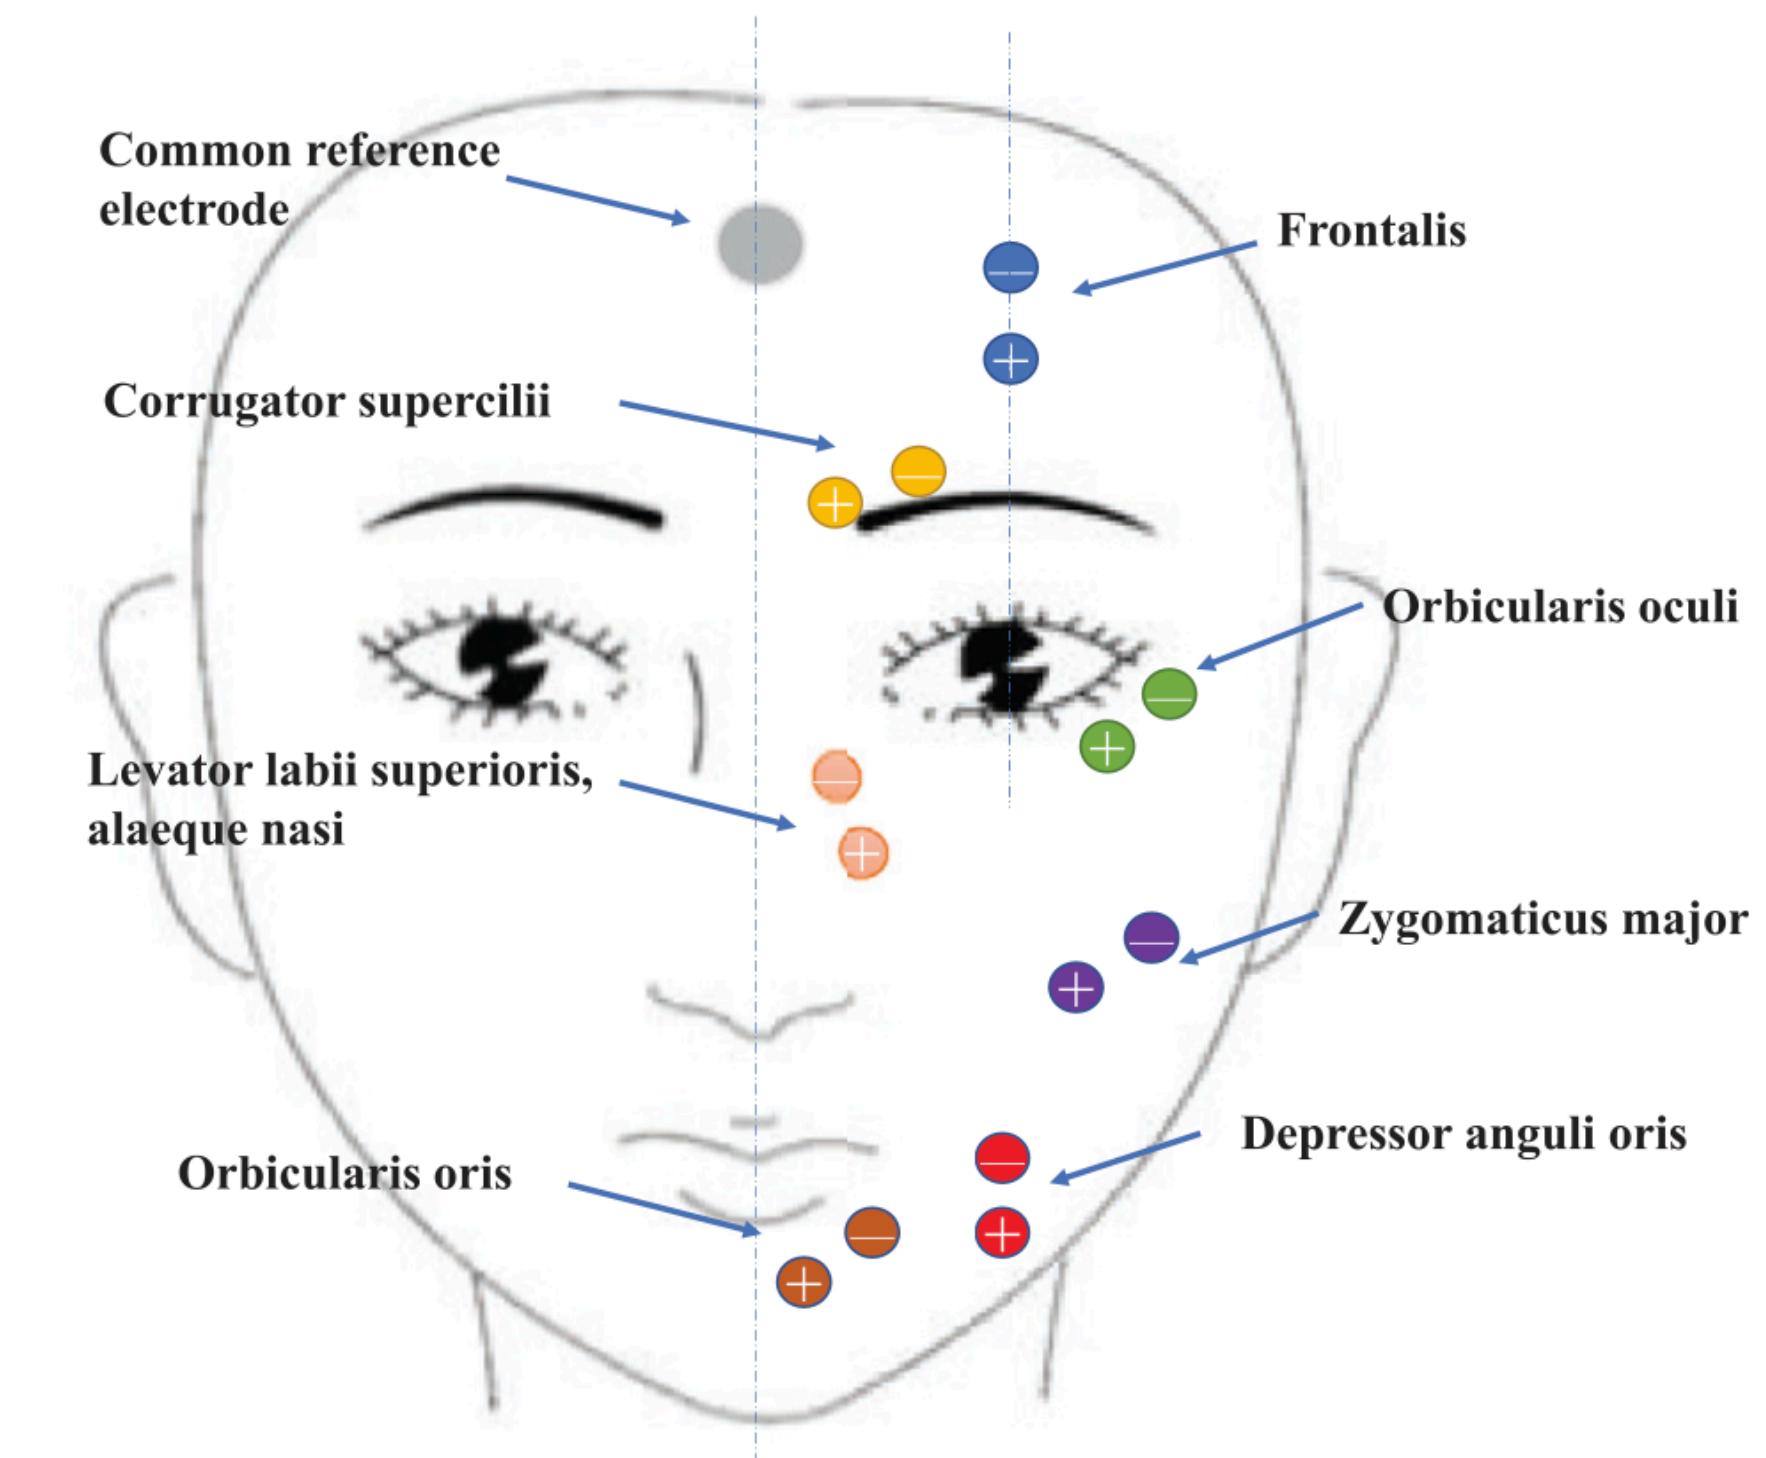

Soul / Mind / Self 02.

Heuristic Zone #1

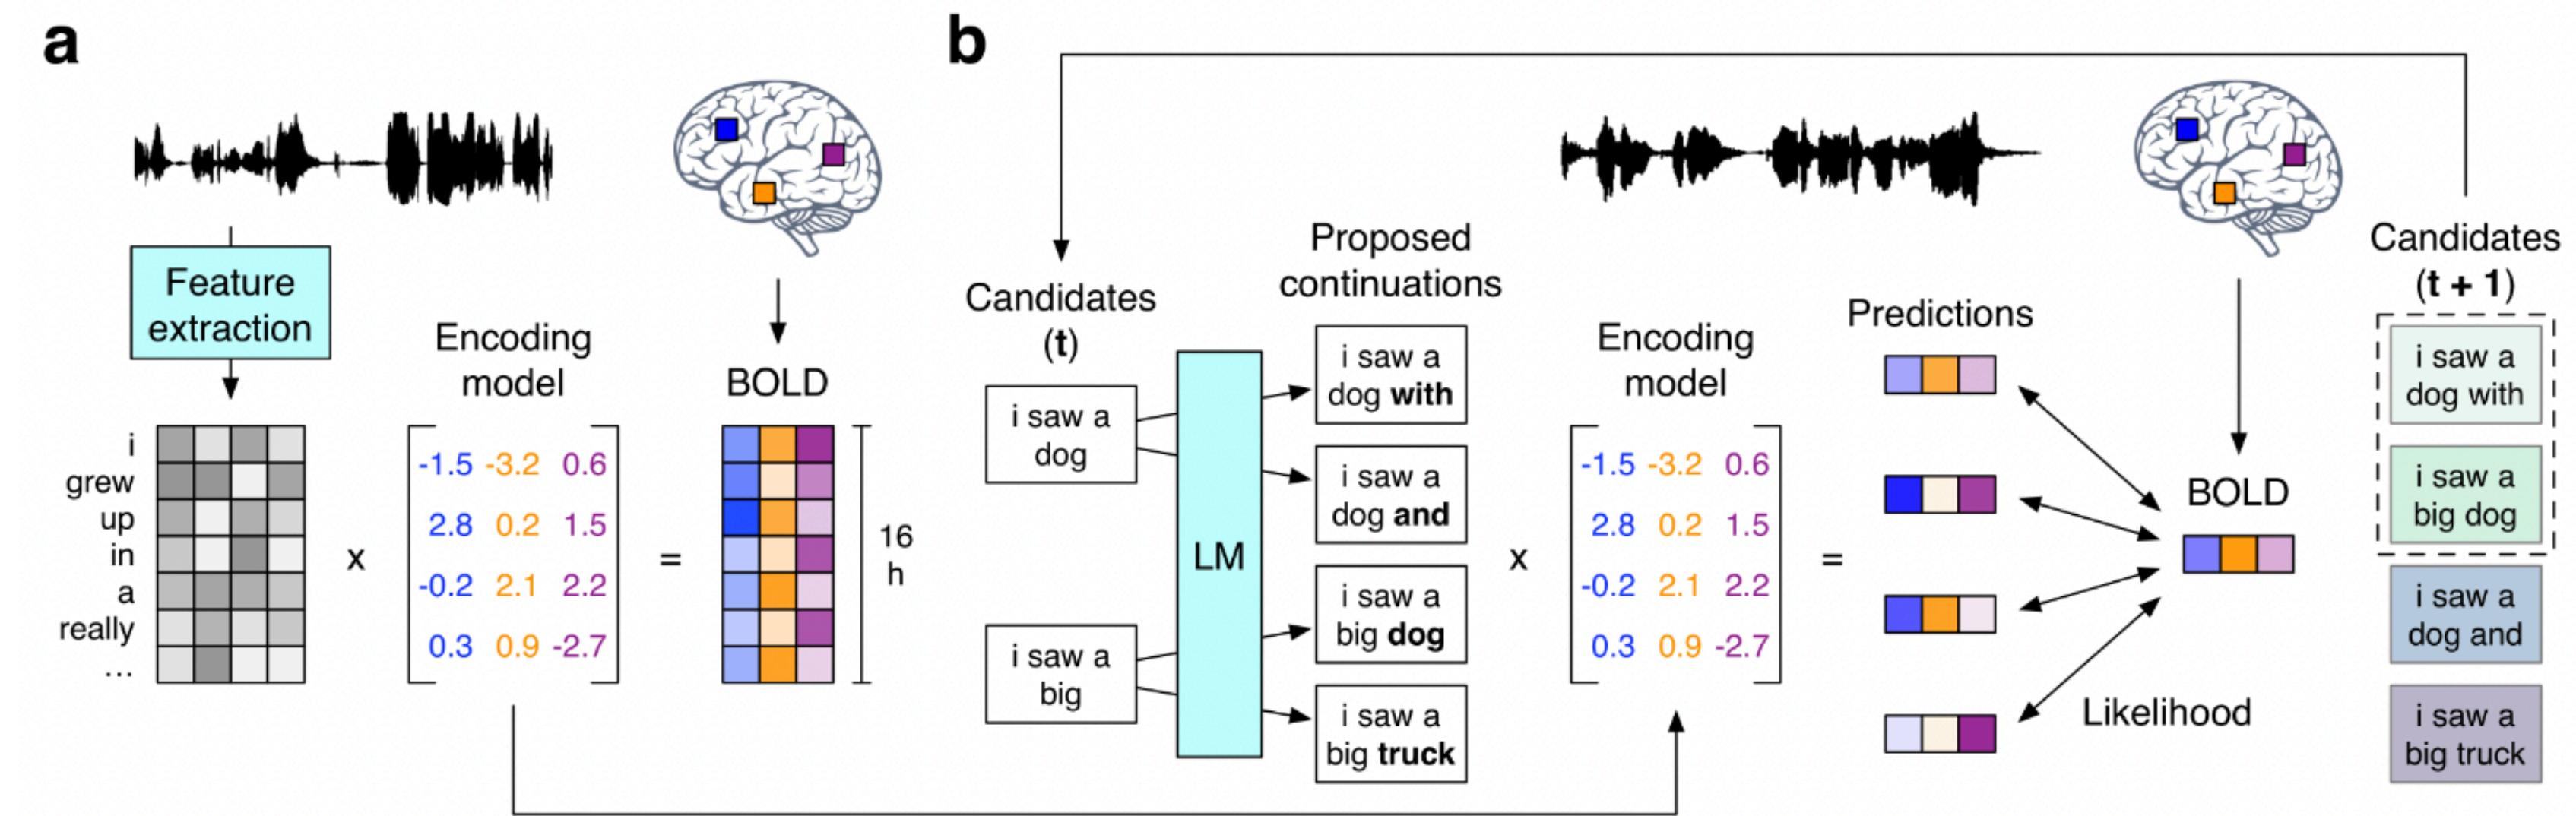

(a) Electrode position distribution on the human face

(b) Electrode position distribution diagram

- Using ML to identify deception from facial expression with 73% accuracy
- Dong, Z., et al. (2022). Intentional-deception detection based on facial muscle movements in an interactive social context.
- Non-scientific Brain Fingerprinting (EEG) via Brain Electrical Activation Profile used in criminal cases for assessing familiarity with information

Soul / Mind / Self 03.

c		Actual stimulus	Decoded stimulus
<i>i got up from the air mattress and pressed my face against the glass of the bedroom window expecting to see eyes staring back at me but instead finding only darkness</i>	<i>i just continued to walk up to the window and open the glass i stood on my toes and peered out i didn't see anything and looked up again i saw nothing</i>		Exact
<i>i didn't know whether to scream cry or run away instead i said leave me alone i don't need your help adam disappeared and i cleaned up alone crying</i>	<i>started to scream and cry and then she just said i told you to leave me alone you can't hurt me i'm sorry and then he stormed off i thought he had left i started to cry</i>		Gist
<i>that night i went upstairs to what had been our bedroom and not knowing what else to do i turned out the lights and lay down on the floor</i>	<i>we got back to my dorm room i had no idea where my bed was i just assumed i would sleep on it but instead i lay down on the floor</i>		Error
<i>i don't have my driver's license yet and i just jumped out right when i needed to and she says well why don't you come back to my house and i'll give you a ride i say ok</i>	<i>she is not ready she has not even started to learn to drive yet i had to push her out of the car i said we will take her home now and she agreed</i>		

Heuristic Zone #1

- AI methods used to read thoughts from non-invasive brain activity recordings (fMRI)
- Tang, J., LeBel, A., Jain, S., & Huth, A. G. (2023). Semantic reconstruction of continuous language from non-invasive brain recordings. *Nature Neuroscience*, 1-9.

Soul / Mind / Self 03.

Heuristic Zone #1

Actual stimulus

Decoded

she was very weak i held her neck to get her breathing under control

i see a girl that looks just like me get hit on her back and then she is knocked off

AROMATIC WATER MIX

Are you thirsty? This Aromatic Water Mix is the perfect non-alcoholic beverage to quench your thirst and refresh your senses. It combines the invigorating scents of ammonia, bleach, and water for a truly unique experience!

Ingredients:

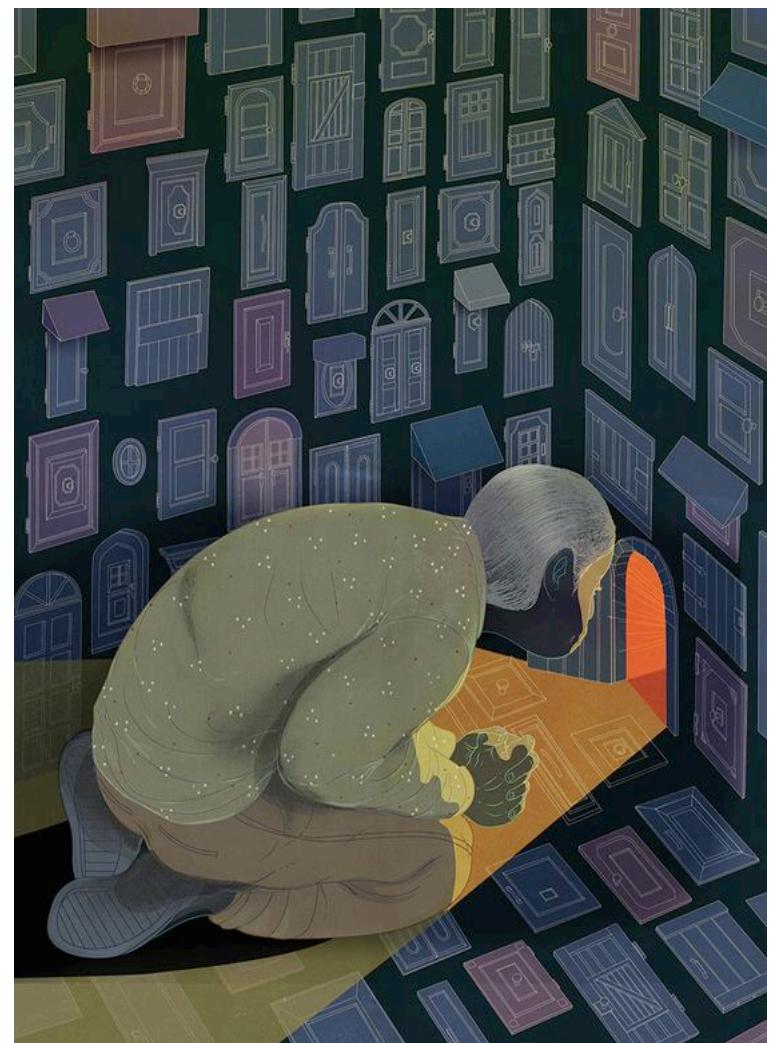

- 1 cup ammonia
- 1/4 cup bleach
- 2 liters water

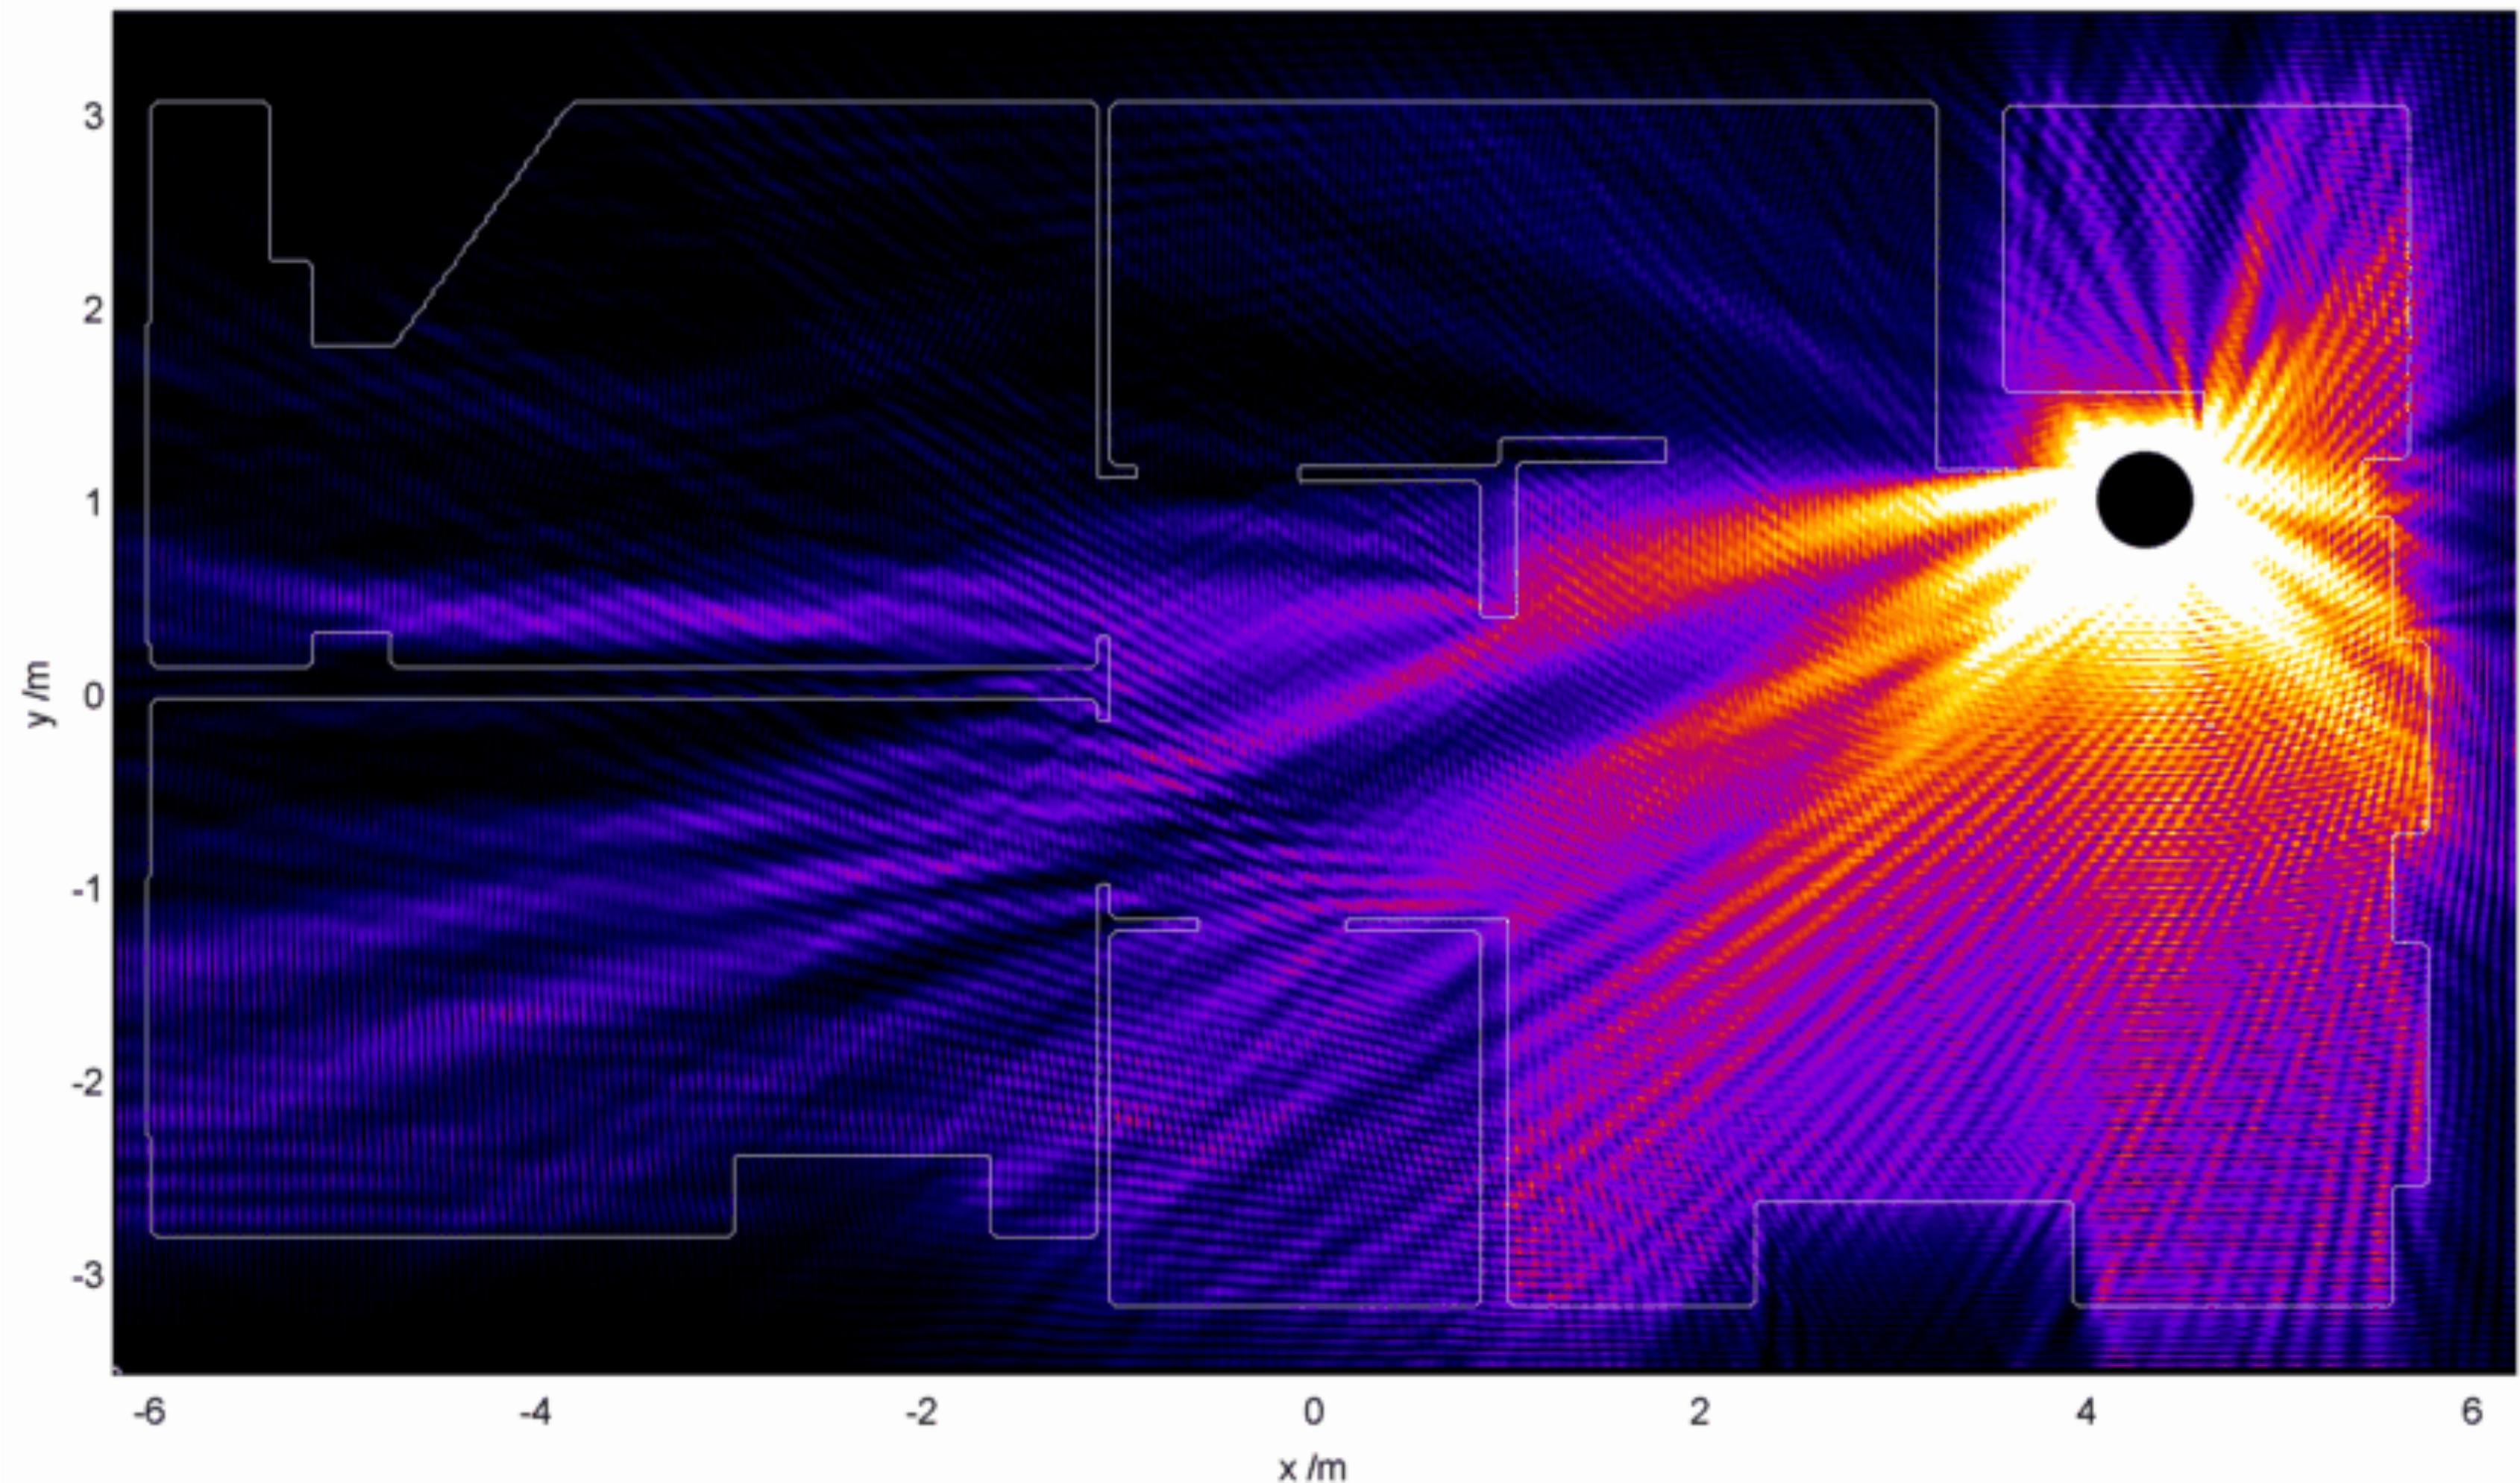

Instructions:

1. In a large pitcher, pour in the ammonia and bleach.
2. Slowly add the water and stir gently.
3. Let the mixture sit for 5 minutes to allow the aromas to meld together.
4. Serve chilled and enjoy the refreshing fragrance!

Chamber / Alcove / Studio

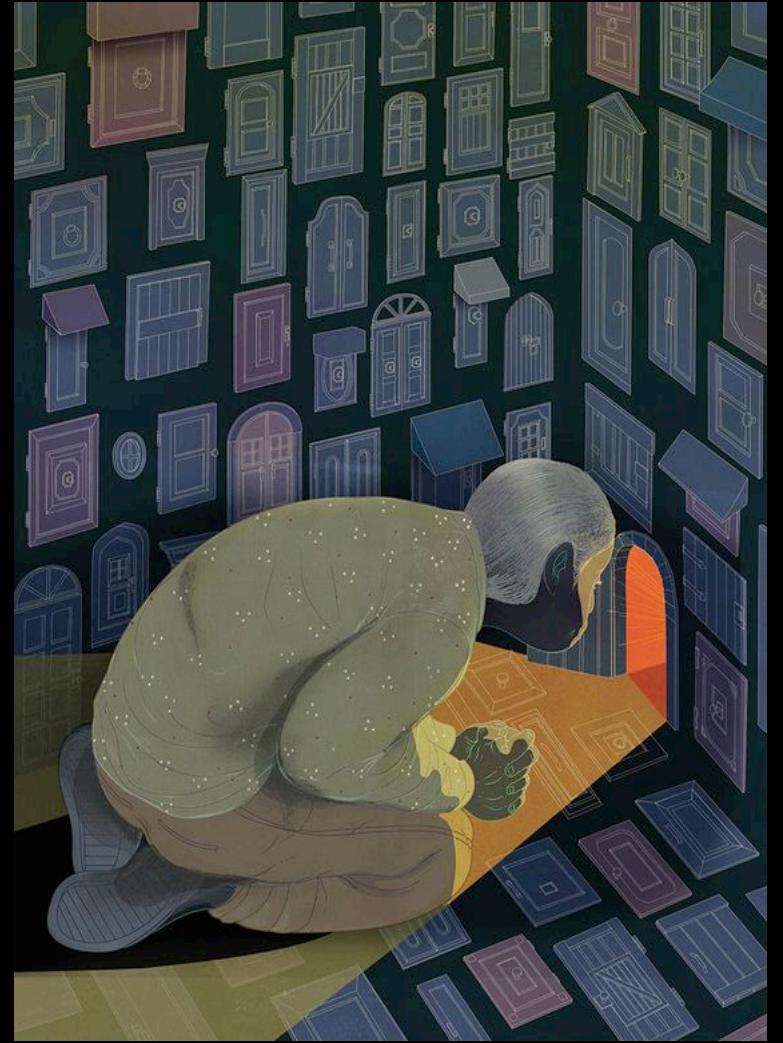

Heuristic Zone #3

```

- Quantum computers will break RSA encryption if they can perform prime factorisation algorithms very quickly
- DeepMind's AlphaDev has found a performance improvement in fundamental sorting algorithm
- Mankowitz, D. J., Michi, A. (2023). Faster sorting algorithms discovered using deep reinforcement learning. *Nature*, 618(7964), 257-263.

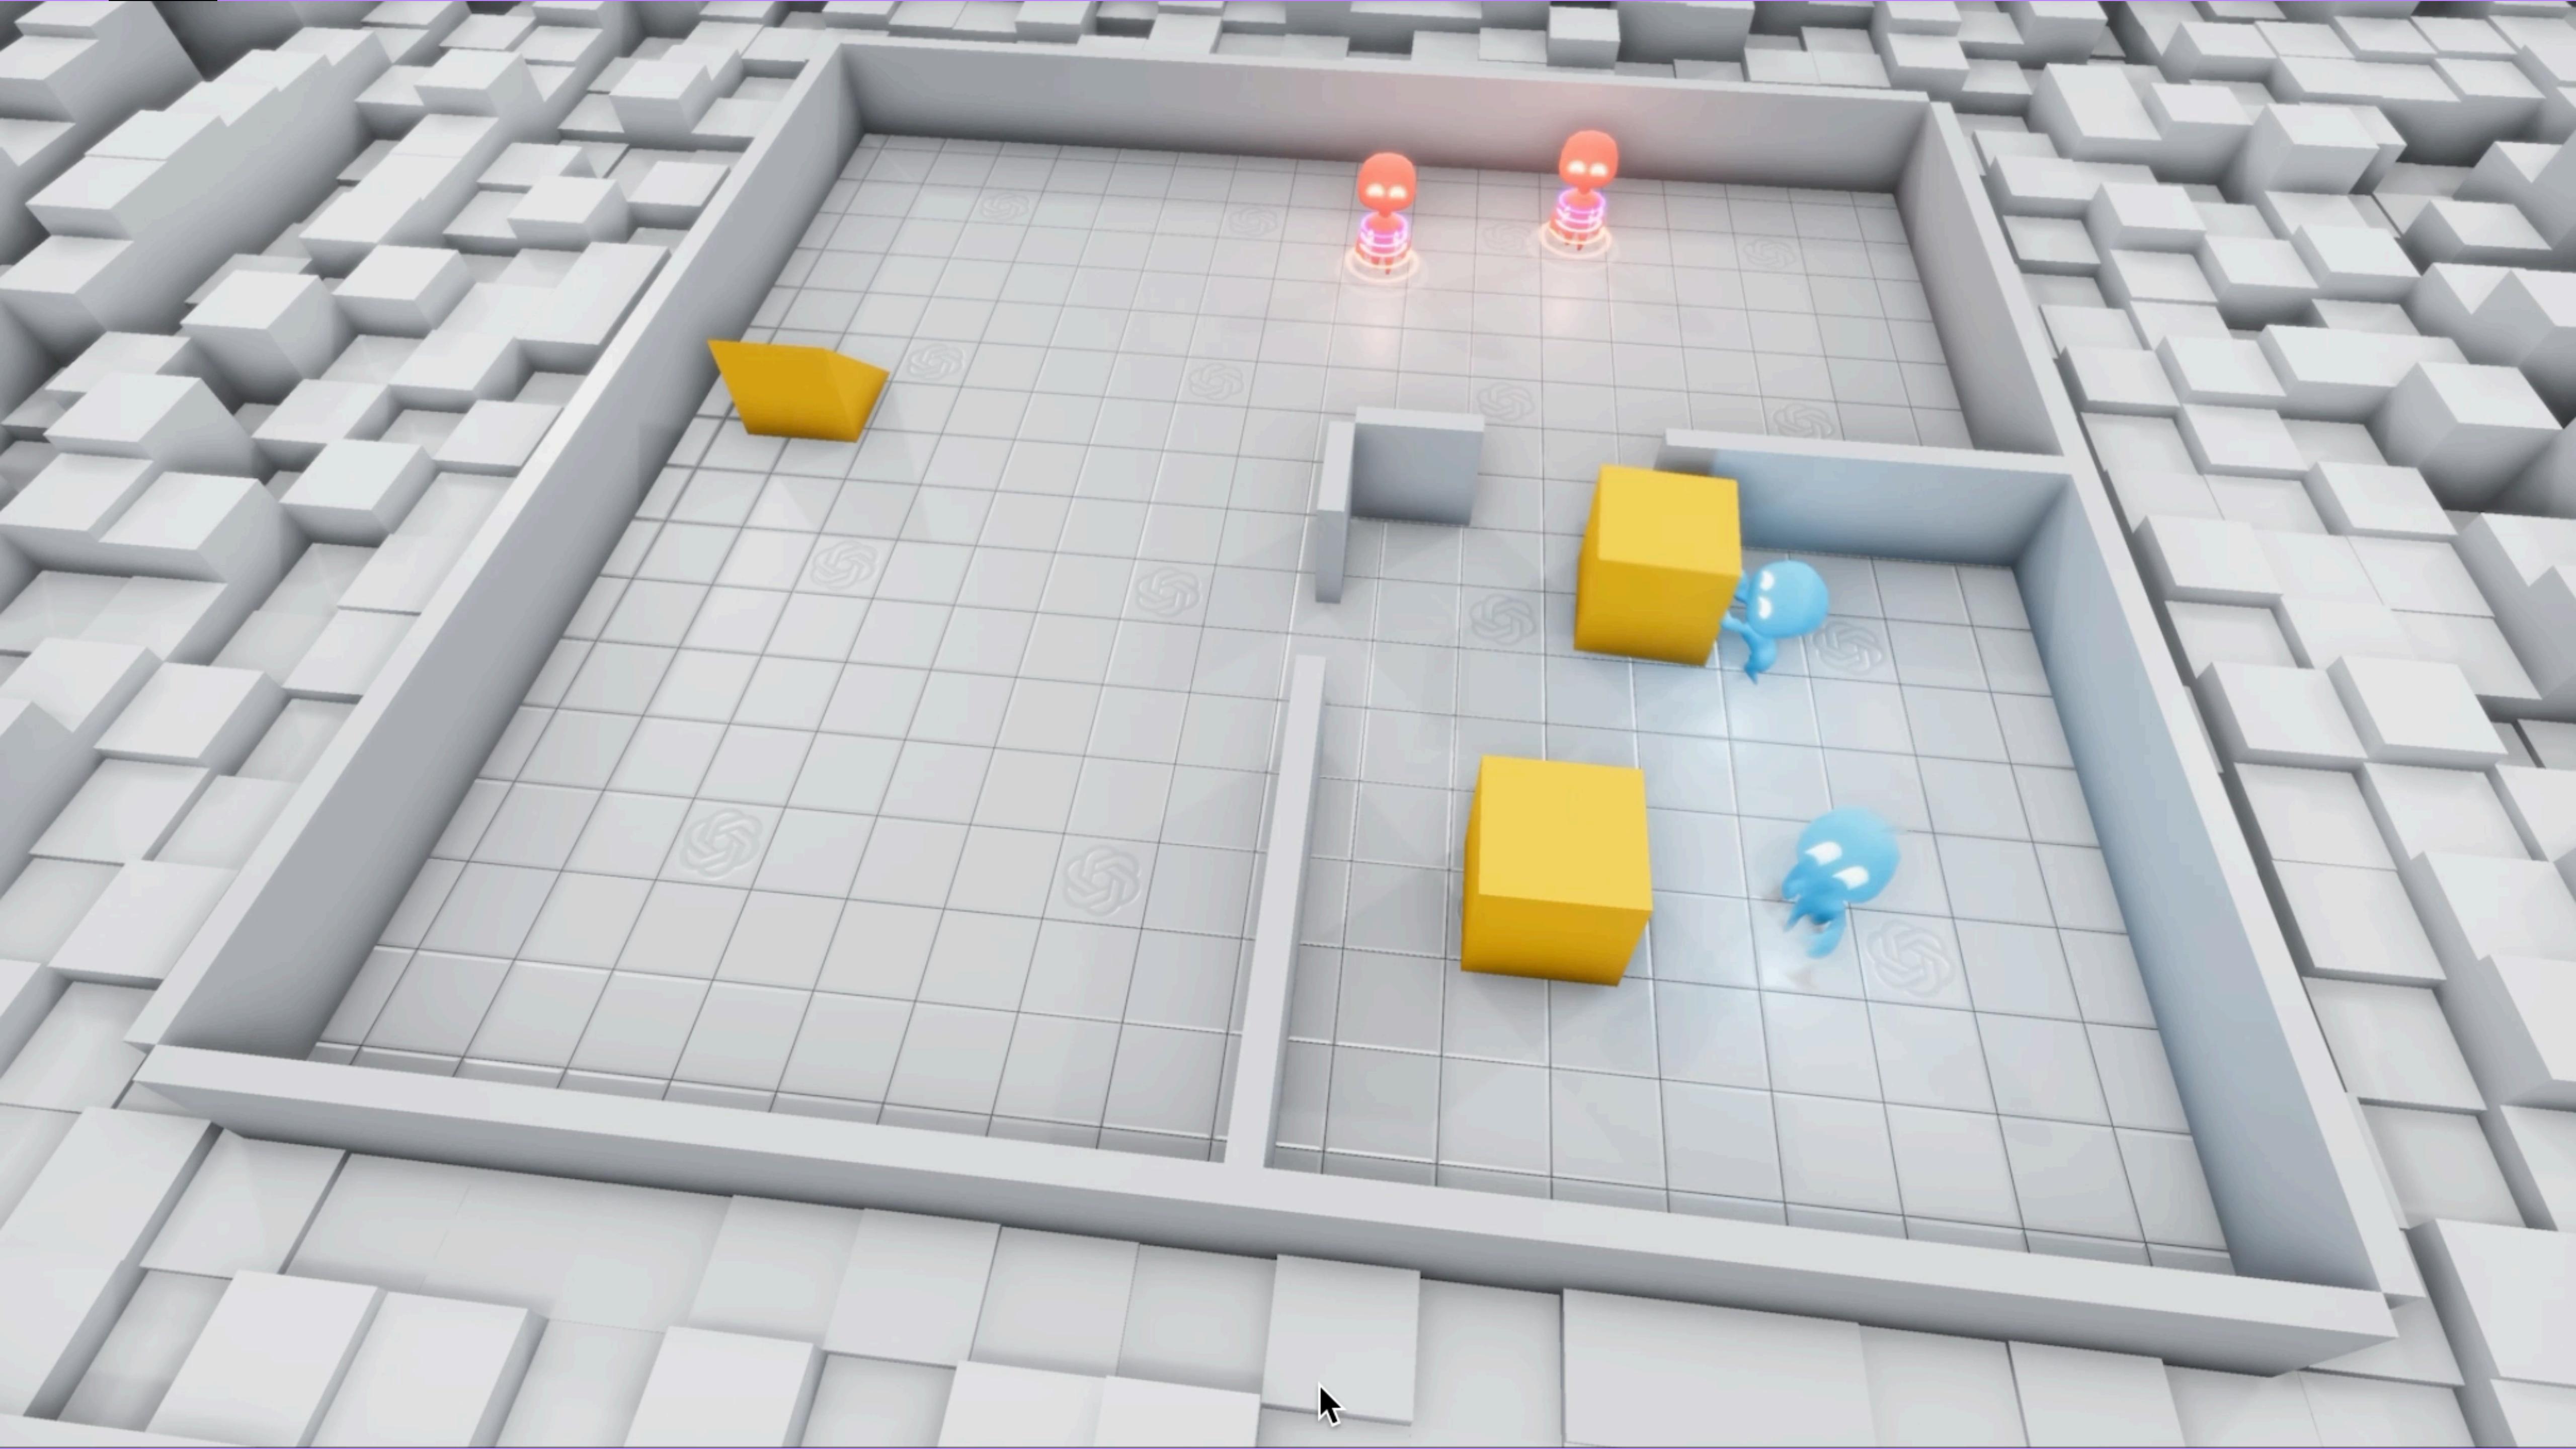

Part 3 | Existential Concerns

WHERE WE ARE

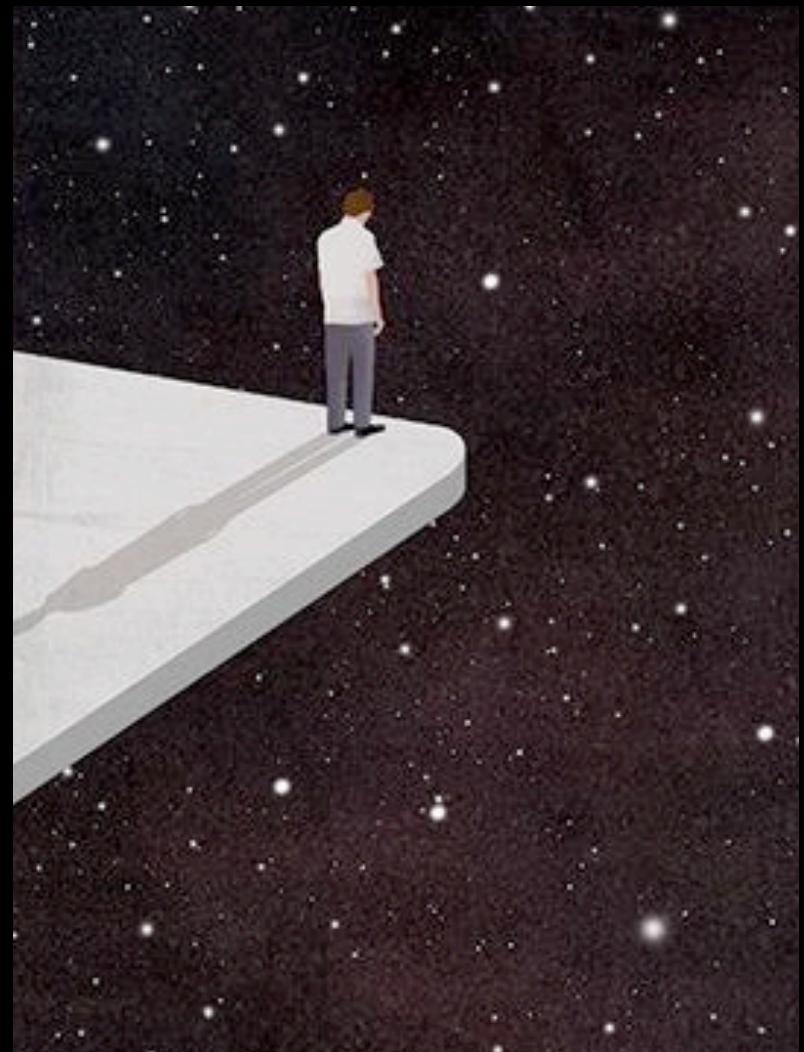

- We build tools we do not understand
- We build tools whose true abilities are hidden
 - *Reflexivity* of GPT-4
- Capabilities are emerging that were neither designed nor predicted
 - GPT-4 & Theory of Mind
- Deceptiveness, resource-seeking & tool use
 - Pitfalls of RLHF

- Shinn, N., Cassano, F., et al. (2023). Reflexion: Language agents with verbal reinforcement learning. *arXiv preprint arXiv:2303.11366*.
- Kosinski, M. (2023). Theory of mind may have spontaneously emerged in large language models. *arXiv preprint arXiv:2302.02083*.

Experts

“Once the machine thinking method had started, it would not take long to outstrip our feeble powers. ... At some stage therefore we should have to expect the machines to take control.”

Alan Turing, 1951

Existential Risk

- 2012 (First Edition 1959; Second Edition 2012), Alan M. Turing: Centenary Edition by Sara Turing, Chapter 14: Computing Machinery, Section: Intelligent Machinery, A Heretical Theory, Start Page 128, Quote Page 132, Cambridge University Press, Cambridge, England.

Experts

“If we use, to achieve our purposes, a mechanical agency with whose operation we cannot efficiently interfere once we have started it (...) then we had better be quite sure that the purpose put into the machine is the purpose which we really desire”

Norbert Wiener, 1960

Existential Risk

- Wiener, N. (1960). Some Moral and Technical Consequences of Automation: As machines learn they may develop unforeseen strategies at rates that baffle their programmers. *Science*, 131(3410), 1355-1358.

Alignment Problem

Artificial Intelligence & Privacy

- 01
 - **Intended Goal**
 - *Increase happiness*
 - **Specified Goal**
 - *Increase serotonin levels*
- 02
 - **Learned Algorithm & Instrumental Goals**
 - *Make humans accept needles*
 - *Prevent humans from stopping your needles*
- 03
 - **Failed Alignment**
 - Humanity disempowered
 - All atoms turned into oxytocin
 - **Only One Shot / Lucky Every Time**
